

PA Application | A 4432 4+4 Mixer With Wallplate Source Control

A 4432 is a stand alone mixer which provides a simple and flexible way to bring multiple audio sources together. It works in conjunction with the A 4433 LCD touchscreen wallplate and A 4931 local zone input wallplate or A 4932 local zone input box.

A 4433 LCD wallplate allows source selection, muting and volume level control for the aux input selected, plus input control & volume for the local input if connected.
